

ROOM SCHEDULING

Get your meeting underway quickly and efficiently with Appspace and Crestron

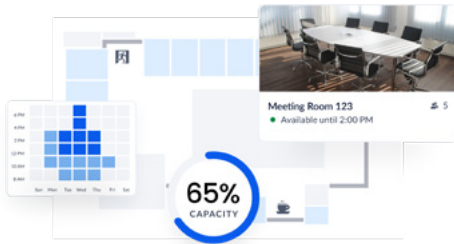

Make meetings easier by being able to see available meeting spaces and book it from outside the room.

The way people work today is changing. The modern workplace is an always-connected environment that expects instant access to information while establishing great value from technology that occupies its real estate. With Appspace, find meeting spaces faster, book it, let colleagues know when you need a little more time, and free up valuable space when meetings are canceled.

The Appspace room scheduling card makes booking a meeting space easy. Publish in portrait or landscape, and always with brand consistency and flawless formatting. Integrate with corporate calendars and into any network with the enterprise-level administrative controls you would expect.

*** Appspace is a simple, secure, and scalable platform that just works.**

How it works

To get started, you will need an Appspace account, a compatible calendar account with administrative access, a compatible device and network connectivity for all three.

First, the compatible device is registered with Appspace and runs the Appspace App. Devices can be touch-enabled for full features or non-touch enabled for view only mode.

Next, in the Appspace console, create a channel for your room and add a Room Scheduling Card. Connect the card to the calendar provider and choose the required meeting room. Configure the preferences for the card, like the ability to book rooms instantly, require attendees to check-in, extend in-progress meetings, and schedule meetings up to seven days ahead. Display room-specific information like seating capacity, video conferencing and AV equipment, network connectivity, and more. Set brand standards like colors, layout, company logo and more, and then publish to the registered device.

From here, book meeting rooms and any calendar changes will be automatically displayed outside the room. A channel can also be overridden with important or emergency messages using alerts. Appspace alerts can be triggered by Singlewire's InformaCast.

Schedule board card

See availability of all meeting rooms in one place. Look ahead and book instantly. Deploy the Room Schedule Board on the TSD-2220, large format kiosk, or in view-only mode on digital signs. Perfect for the lobby of each office floor or at the entrance to conference spaces.

Flexible deployments

Deploy from the cloud, on-prem, or a combination of both.

Compatible calendars

Connect to Google Calendar or Microsoft Office 365, or Appspace Native Calendar.

Compatible devices

Publish to any of the following:

- Crestron TSS-7 Series
- Crestron TSS-10 Series

The Appspace App is enabled through the TSS firmware.

Platform for the modern workplace. Room scheduling is just one of the experiences possible with the Appspace platform. Try Appspace for digital signs & video walls, collaboration displays, enterprise TV, kiosks, and more. To learn more visit appspace.com

Build for the cloud. The Appspace platform is fast, secure, and grows with you. With flexible configuration settings and powerful administrative tools, deployments are tailored for you.
